

Contents

| | | |
|-----|--|----|
| §1 | Introductory remarks | 1 |
| §2 | Elastic eigenstates | 5 |
| §3 | Structural formula | 11 |
| §4 | On the mathematical and physical content of a structural formula | 21 |
| §5 | Representation of Hooke's law in the form of an orthogonal decomposition | 25 |
| §6 | Elastic energy | 29 |
| §7 | Some material constants and elastic tensors | 31 |
| §8 | New information on elastic constants | 35 |
| §9 | Elasticity of bodies with rigid constraints | 41 |
| §10 | First examples | 43 |
| §11 | On classification of elastic materials | 63 |
| §12 | Symmetry and elastic eigenstates | 69 |
| §13 | Plasticity and other generalizations | 75 |
| §14 | Concluding remarks | 79 |
| | Appendices | 81 |
| | References | 89 |
| | Extended Commentary to English Translation | 93 |
