Łukasz J. Nowak

Adaptive feedback control system for reduction of vibroacoustic emission

PhD Dissertation
Supervisor: dr hab. inż. Mirosław Meissner
Auxiliary supervisor: dr inż. Tomasz G. Zieliński

Institute of Fundamental Technological Research
Polish Academy of Sciences

Warsaw 2014

Contents

1. Introduction **19**
- 1.1 Problem statement . . . 19
- 1.2 Motivation . . . 22
- 1.3 State of the art . . . 23

2. Vibrations of thin beam and plate structures **27**
- 2.1 Theoretical considerations . . . 27
- 2.2 Numerical simulations . . . 33
- 2.3 Orthogonality of the eigenfunctions . . . 37

3. Acoustic radiation of vibrating plate structures **41**
- 3.1 Introduction . . . 41
- 3.2 Structural-acoustic coupling . . . 44
  - 3.2.1 Outline . . . 44
  - 3.2.2 Numerical model . . . 44
  - 3.2.3 Results and discussion . . . 46
- 3.3 Far-field acoustic radiation of a baffled plate . . . 48
- 3.4 Free-field acoustic radiation – BEM model . . . 52
  - 3.4.1 Theoretical background . . . 52
  - 3.4.2 Implementation – the algorithm . . . 57
- 3.5 Experimental investigations, results, and discussion . . . 62
- 3.6 Conclusions . . . 65

4. Piezoelectric sensors and actuators **71**
- 4.1 State of the art, assumptions, and general description . . . 71
- 4.2 Piezoelectric sensors . . . 73
- 4.3 Piezoelectric actuators . . . 75
- 4.4 Signal conditioning . . . 77
- 4.5 Some technical aspects on the preparation of the composite structures for active control systems . . . 81
- 4.6 Numerical and experimental investigations . . . 83
  - 4.6.1 Beam structures . . . 84
  - 4.6.2 Plate and panelled structures . . . 87
- 4.7 Excitation of resonant vibrations . . . 93
- 4.8 Conclusions . . . 95

5. Active vibroacoustic control system **97**
5.1 Aim and methods 97
5.2 Single feedback loop 101
5.3 Multiple independent feedback loops 106
5.4 Identification of the external disturbance 111
5.5 Implementation of the active control system 116
5.6 Experimental investigations 119
5.7 Conclusions 138

6. Concluding remarks **141**
6.1 Summary 141
6.2 Scope of contribution 143
6.3 Recommendations for future work 144

Bibliography **147**
