Contents

1. Preface 11

2. Supercomputers, *M. Milewska* 15

2.1. History 15
2.2. TOP 500 List 18
2.2.1. Top 10 Supercomputers 19
2.3. Supercomputers in Poland 27
2.3.1. Polish TOP500 29
2.3.2. New Polish investments 33
2.4. Future of supercomputers 34
2.5. Short history of IPPT computational resources 35

3. Grid computing, *R. Gawlik* 37

3.1. Differences between grid and cluster 37
3.2. Examples of grid systems in Poland 38
3.3. Grid BIOCENTRUM OCHOTA 39
3.4. Grafen cluster 39
3.4.1. Equipment 39
3.4.2. Software 42

4. Scientific software, *R. Gawlik* 45

4.1. ABAQUS 45
4.1.1. ABAQUS/Standard 45
4.1.2. ABAQUS/Explicit 45
4.1.3. ABAQUS/CAE 46
4.1.4. Links 46
4.2. ANSYS CFD 46
4.2.1. ANSYS Fluent 46
4.2.2. ANSYS CFX 47
4.2.3. Workbench 47
4.2.4. Links 47
4.3. COMSOL 48
4.3.1. Links 48

4.4. DL_POLY CLASSIC 49
4.4.1. Links 49
4.5. LAMMPS 50
4.5.1. Links 50
4.6. LMGC90 51
4.6.1. Links 51
4.7. LS-DYNA 51
4.7.1. Links 52
4.8. MATHEMATICA 52
4.8.1. Links 53
4.9. MATLAB 53
4.9.1. Toolbox 54
4.9.2. Parallel programming 54
4.9.3. Links 55
4.10.MUMPS 55
4.10.1. Links 55
4.11.OPENFOAM 56
4.11.1. Links 56
4.12.PARAVIEW 57
4.12.1. Links 57
4.13.TECPLOT 360 57
4.13.1. Links 57
4.14.VMD 58
4.14.1. Links 58

5. Grafen cluster user's guide, *R. Gawlik, E. Postek* **61**

5.1. Introduction 61
5.2. How to use the system 62
5.3. Virtual servers 62
5.3.1. Windows 2008 server 62
5.3.2. MATLAB Computing Server 63
5.4. HPC system access 63
5.4.1. LOG IN – SSH 63
5.5. Files transfer – scp 64
5.5.1. Linux and Mac OS 64
5.5.2. Windows 64
5.6. Files transfer – sftp 64
5.6.1. Interactive mode 64
5.6.2. Batch mode 65
5.7. Task manager 65
5.7.1. Available resources 65
5.7.2. Starting the task 66
5.7.3. Accurate resources identification 68
5.7.4. Parallel programs 69
5.8. Task monitoring 71

5.8.1. Task state 71
5.8.2. Deleting the task 74
5.8.3. Output data 74
5.9. Environment modules 74
5.10. Mass storage 77

6. Starting applications on cluster, *R. Gawlik* **79**

6.1. Introduction 79
6.2. ANSYS Fluent Example 79
6.3. COMSOL Example 81
6.4. LS-DYNA Example 82
6.5. MATLAB Example 84
6.6. Environment module programs 85

7. Selected applications **87**

7.1. Parameter sensitivity of a tensegrity model of a tissue, *E. Postek* 87
7.1.1. Introduction 87
7.1.2. Methodology, mechanical model 88
7.1.3. Mathematical formulation 89
7.1.4. Computer implementation 92
7.1.5. Numerical illustration 94
7.1.6. Final remarks 97
7.2. Generic models of linear and non-linear visco-elastic surface deformation, *E. Postek* 98
7.2.1. Problem statement 98
7.2.2. Nonlinear creep 99
7.2.3. Numerical algorithm 101
7.2.4. Numerical example 102
7.2.5. Final remarks 105
7.3. Microstructure-based modelling of sound absorption in rigid porous media, *T. Zieliński* 106
7.4. Reliability analysis of reinforced concrete structures, *E. Postek* 111
7.4.1. Introduction 111
7.4.2. Reliability algorithm 111
7.4.3. Performance functions 112
7.4.4. Parameter sensitivity 113
7.4.5. Constitutive model 114
7.4.6. Applied finite element 116
7.4.7. Computer program 122
7.4.8. McNeice plate 123
7.4.9. Nuclear containment shell 124
7.4.10. Final remarks 131
7.5. Development of a concept of an agent-stress model of a tissue, E. Postek 133

7.5.1. Problem statement 133
7.5.2. General algorithm. 134
7.5.3. Characterization of the agent model 134
7.5.4. Agent model 135
7.5.5. Coupling scheme 136
7.5.6. Mechanical model 137
7.5.7. Summary 139
7.6. Mould filling with solidification, *E. Postek* 140
7.6.1. Introduction 140
7.6.2. Flow problem 140
7.6.3. Microstructural solidification model 141
7.6.4. Numerical example 143

Appendix **147**

A.1. FibFlex – Computation of flexible polymer nanofibers bending 147
A.2. SpatKin – rule-based modeling of spatially extended biochemical systems 148
A.3. DrugRelease 149
A.4. AceGen/AceFEM 151
A.5. Crack modeling in composites package 152
A.6. Residual Thermal Stress (RTS) Package 153
A.7. YADE-PM – Extension of YADE discrete element method environment 154
A.8. Nanotrack: Nanoparticles motion detection program 155
A.9. Original computer program MC-UNBAL 156
A.10. STAND – STochastic ANalysis and Design 157
A.11. DCAST 158
A.12. DMFILL 159
A.13. DEMSYS 160
A.14. DTENS 161
A.15. OREGANO-VE 162
A.16. VECDS – Visual Editor of Crystal Defects 163
